Bibliography of North American Shelterbelt Research¹

by

A. E. Campbell and R. H. M. Pratt²

INTRODUCTION

This bibliography provides a ready reference to technical literature on establishing and maintaining shelterbelts. It includes references on cultural practices, entomology, pathology, soils, climatic conditions and tree species selection.

References are listed by subject, using the Oxford System of Decimal Classification for Forestry, and by author. Those publications not available to the authors for review, but judged to have a direct bearing on the subject of shelterbelts, have been listed under ODC 266. The bibliography lists references to 1969. A few more recent publications (up to 1971) have been included.

INDEX TO SUBJECT LISTING

1. FACTORS OF THE ENVIRONMENT, BIOLOGY

Atmosphere	111
Botany - systematic	17
Ecology - animal	15
- plant	18
Humidity	111.7
Hydrology	116
Soil, Soil science	114
Wind	111.5
Zoology - systematic	14

2. SILVICULTURE

Amelioration of forest sites	237
Arboreta	271
Artificial stands, plantations	228.7
Choice of species and form	228.0
Farm forests	264
Formation of stands by planting	232.4
Hedges and hedge plants	274
Maintenance and improvement of pastures	268.4
Ornamental street and roadside trees	273
Pastured forests	268
Plant rearing, nursery practice	232.32
Planting - methods	232.42
- stock	232.41
Preparatory work, auxiliary measures	232.2
Regeneration and formation of stands	23
Shelterbelts and windbreaks	266
Spacing and arrangement in plantations	232.43
Tending - stands and trees	24
- trees	245

3. WORK SCIENCE (WORK STUDIES), HARVESTING OF WOOD:
LOGGING AND TRANSPORT. FOREST ENGINEERING

Work science (work studies) general	30
-------------------------------------	----

4. FOREST INJURIES AND PROTECTION

Animal - damage	45
Control - chemical	414
- natural and biological	411
Fungi and bacteria	443
Insects - damage	453
Soil conditions, erosion effects	424
Temperature influences, Insolation	422
Virus diseases	444
Weeds - forest	441

5. FOREST MENSURATION. INCREMENT: DEVELOPMENT AND
STRUCTURE OF STANDS. SURVEYING AND MAPPING

Measurements - stem dimensions	52
--------------------------------	----

6. FOREST MANAGEMENT. BUSINESS ECONOMICS OF FORESTRY
ADMINISTRATION AND ORGANIZATION OF FOREST ENTERPRISES

Forest management, general theory and principles	61
Forestry as a business: general	64
Timber growing - special business problems	65
Working plans	
- yield	
- annual or periodic, regulation	62

9. FORESTS AND FORESTRY FROM A NATIONAL POINT OF VIEW.
SOCIAL ECONOMICS OF FORESTRY

Direct economic significance of forests	906
Farm forests, small forests	923.4
Forest statistics and resources	905
General land use planning, regional planning	911
Indirect significance of forests	907
Other methods to implement forest policy	94
Privately owned forests	923
