Ondro, W.J., B.W. Karaim, R.A. Bohning, and G.R. Stevenson. 1980.

A directory of wood-using industries in Alberta, 1979. Environ. Can., Can. For. Serv., North. For. Res. Cent. Edmonton, Alberta. Inf. Rep. NOR-X-220.

ABSTRACT

In the summer of 1979 a survey was conducted of the primary wood-using industries in Alberta, including sawmills, planing mills, plywood mills, wood treating plants, and pulp, paper, and paperboard mills. Information was collected on mill location, ownership, capacity, wood supply, current production and employment, products, markets, marketing agents, woodlands equipment, and mill facilities.

Résumé

Durant l'été 1979, une étude a eu lieu sur les industries primaires du bois en Alberta, comprenant les usines de sciage, de rabotage, de contreplaqué, de traitement du bois, de pâtes et papiers et de cartons. Des données ont été colligées sur la localisation, les propriétaires, la capacité, les approvisionnements en bois, la production et l'embauche actuelles, les produits, les marchés, les agents de marketing, l'outillage sur les terres à bois et les installations de ces usines.

INTRODUCTION

Most of the information in this directory was gathered during the summer and fall of 1979 by staff of the Northern Forest Research Centre in on-site interviews with personnel of Alberta's wood-using industries. This subsequently was supplemented by telephone interviews, previously published directories (Teskey and Smyth 1973, 1974; Karaim 1977), and records of the Alberta Forest Service.

In this directory, Alberta's primary wood-using establishments are grouped into six activity categories: sawmills, planing mills, plywood mills, wood treating plants, miscellaneous wood-using industries (including pallet plants, lath mills, and building timber plants), and pulp, paper, and paperboard mills. Sawmills have been subdivided into four production levels: 5 MM fbm or more, 1 MM to 4.999 MM fbm, 100 M to 999 M fbm, and less than 100 M fbm per year. Sawmills producing less than 1 MM fbm per year are listed by forests. Wood treating plants are broken into two categories: 100 M cu. ft. or more and 99 M cu. ft. or less per year.

There has been no attempt to separately describe sawmills and planing mills that function as integrated operations; however, planing mills that operate independently through purchase of rough lumber or those that resaw and plane existing rough lumber are listed in a separate category. Pulp and paper also includes paperboard mills and those building materials plants whose manufacturing process is identical or bears close resemblance to pulp and paper. A listing of the abbreviations used throughout the directory and an alphabetical index of the primary wood-using industries are included.

Information on mill location, ownership, capacity, wood supply, current production and employment, products, markets, marketing agents, woodlands equipment, and mill facilities is provided for each of Alberta's primary wood-using industries. Highlights for 1978-79 include the production of 801.3 MM fbm of lumber and 308,130 bone dry units (2400 lb) of wood chips by the sawmill industry (Table 1). Over 516,000 tons of pulp and paper, 1,300 MM sq. ft. (1/16" basis) of plywood, and 100 MM sq. ft. (1/2" basis) of paperboard were produced. Alberta's 458 primary wood-using industries and independent log producers created 6356 man/years of employment.

For the convenience of the reader, there are also listings of management personnel of the Alberta Forest Service in Edmonton (Table 2) and in the Regional Headquarters (Table 3), associations relevant to Alberta's primary wood-using industries (Appendix 1), and metric equivalents of the forest products produced (Appendix 2).

Table 1. Alberta's primary wood-using industries in 1978-79,
number of firms and annual production and employment

Industry	Number of firms	Production	Employment in mills and woodlands (man/years)
Sawmill-planing complexes producing 5 MM fbm or more	26	661.6 MM fbm lumber 300,530 BDU's wood chips ¹	2872
Sawmill-planing complexes producing between 1 MM and 4.999 MM fbm	29	64.1 MM fbm lumber 7,600 BDU's wood chips ¹	267
Sawmill-planing complexes producing between 100 M and 999 M fbm	128	38.5 MM fbm lumber	315
Sawmill-planing complexes producing less than 100 M fbm	211	8.8 MM fbm lumber	168
Independent planing mills	18	83.0 MM fbm lumber	82
Plywood plants	3	1,318 MM sq. ft. (1/16" basis) - plywood	430
Wood treating plants	18	9.9 MM cu. ft. treated stock 1.1 MM fbm lumber	211
Miscellaneous wood-using industries	20	27.2 MM fbm	133
Pulp, paper, and paperboard mills	5	516,000 tons pulp/paper 108 MM sq. ft. (1/2" basis) - paperboard	1761
Independent log producers	- ²	--- ³	117
TOTAL	458		6356

¹ One BDU = 2400 lb of bone dry wood chips.

² Not listed in the directory.

³ Included as purchased wood in the sawmill-planing industries.

Portable sawmill with a 50" circular blade

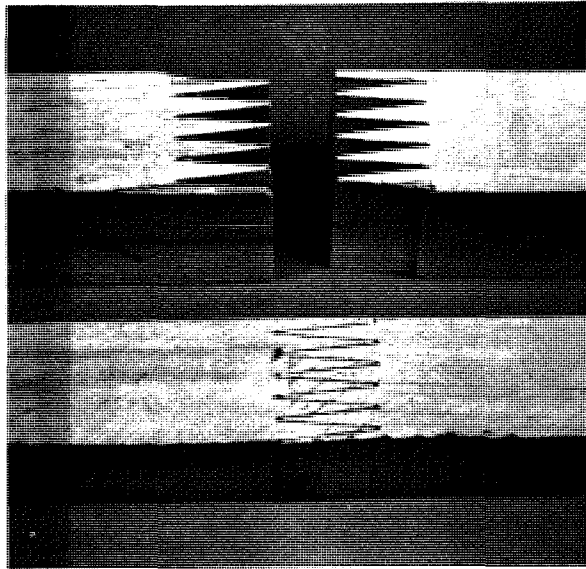

Typical cut-off saws used at larger sawmills

Portable planing equipment used to dress rough lumber

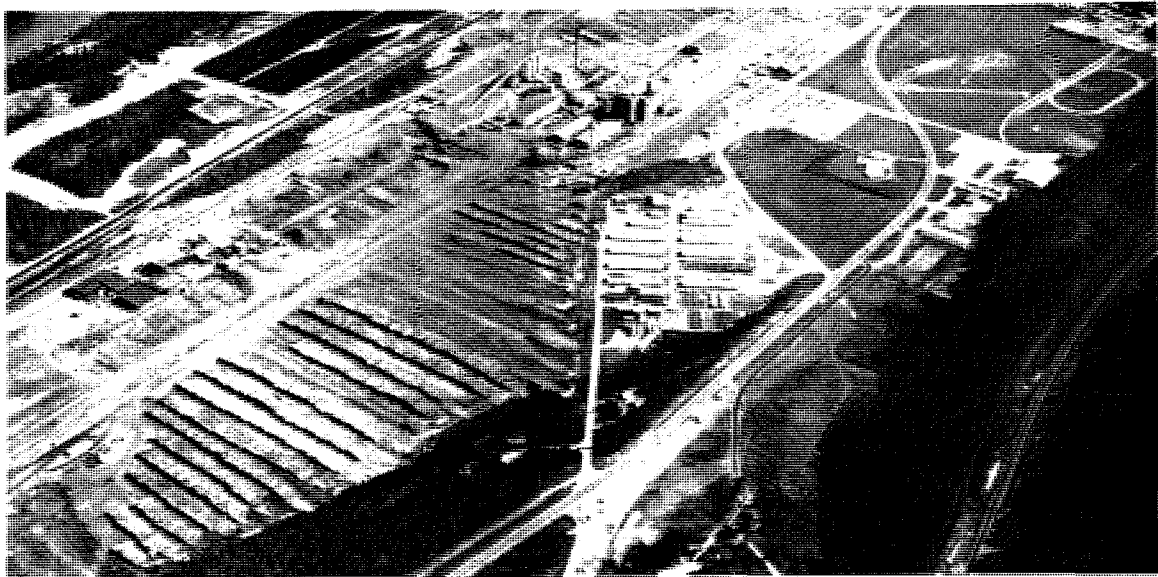

Dressed, kiln-dried lumber ready for marketing

Finger-jointed lumber

Storage bins for wood chips, a by-product of the sawmill industry

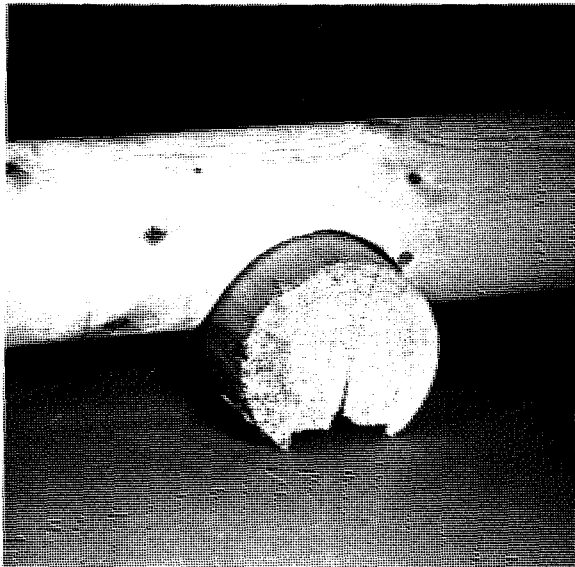

Aerial view of a pulp mill-sawmill complex

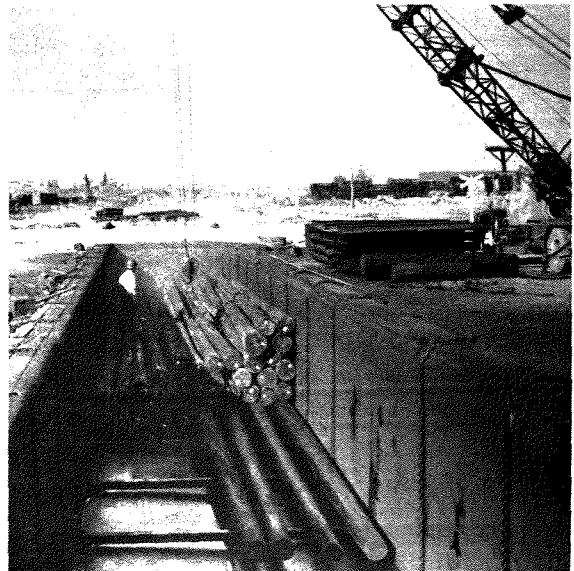

Plywood logs (peelers)
held in storage

Lath mill

Machine-notched logs for use in
building log houses

Open tank for treating poles and
other wood products

SAWMILL-PLANING COMPLEXES

MORE THAN 5 MM FBM

SAWMILL-PLANING COMPLEXES MORE THAN 5 MM FBM

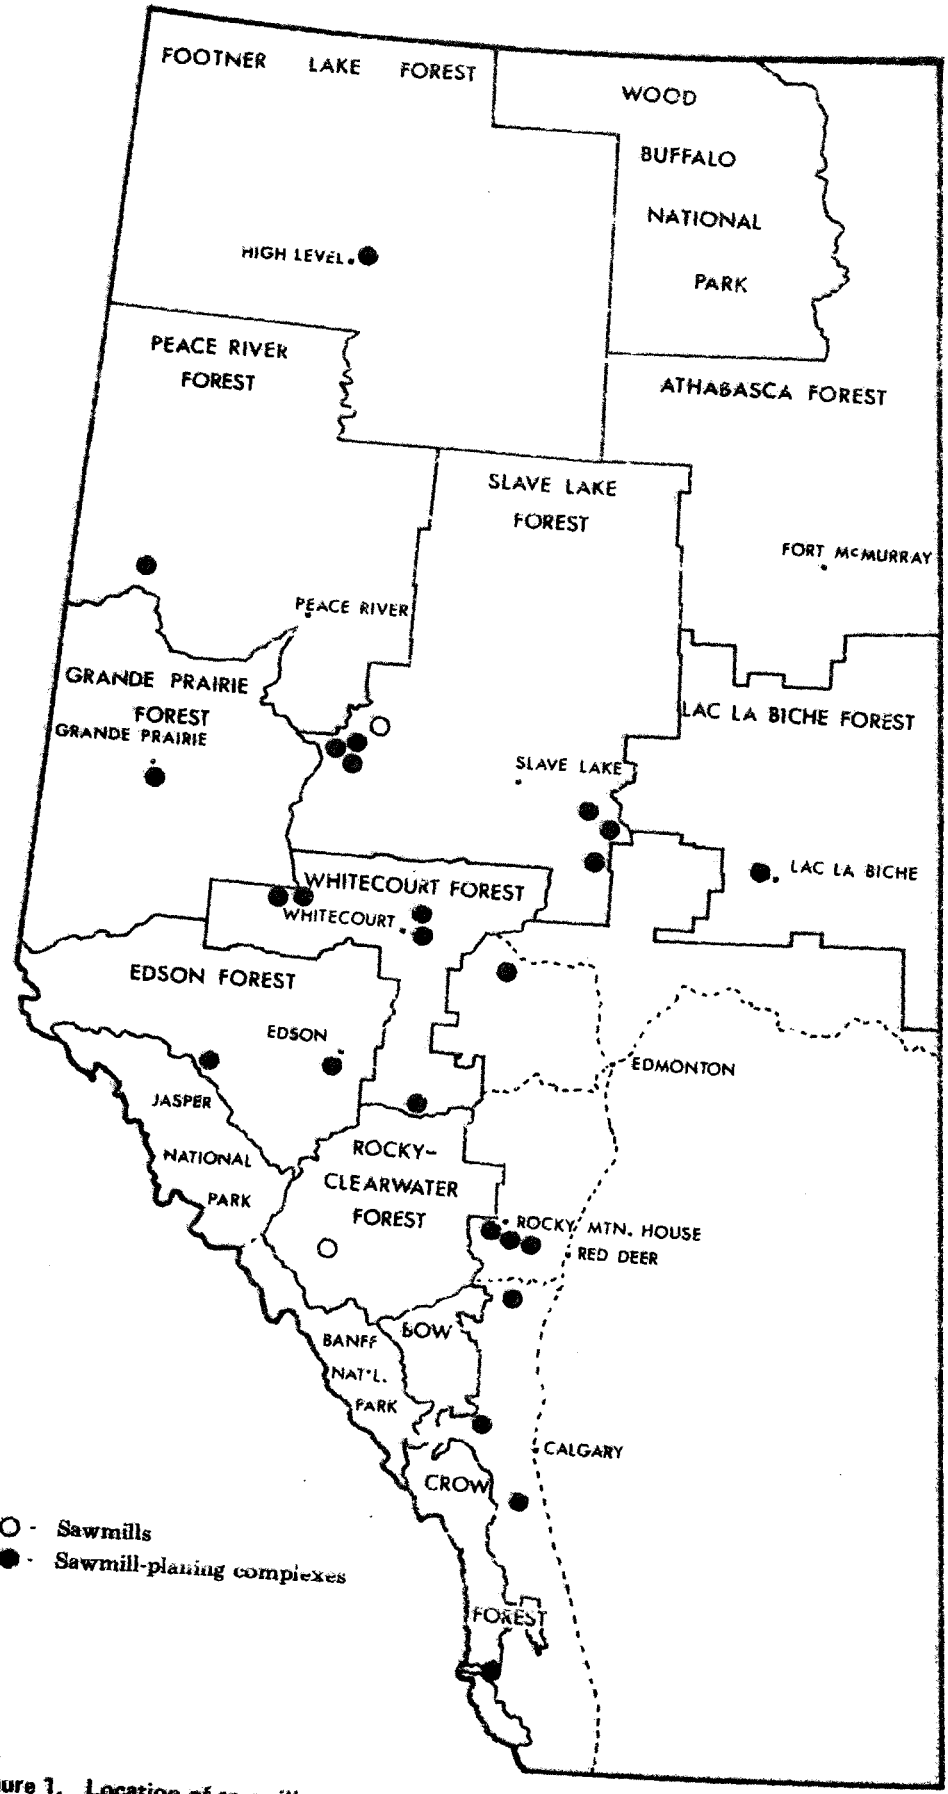

Figure 1. Location of sawmills producing 5 MM fbm or more per year.

APPENDIX 1

WOOD INDUSTRY ASSOCIATIONS

Alberta Forest Products Association (A.F.P.A.)
204 - 11710 Kingsway Avenue
Edmonton, Alberta
T5G 0X5

Telephone: 452-2673

"Regulates product standards for the lumber industry in Alberta under the National Lumber Grades Authority Rules, which allows registered members to grade lumber. A.F.P.A. stamped lumber is acceptable on both the Canadian and American market. The Association promotes and participates in activities which facilitate the development, improvement and better understanding of the industry by the members, other groups and the public."

American Wood Preservers Association (A.W.P.A.)
Suite 4444, 7735 Old Georgetown Road
Bethesda, Md. 20014
U.S.A.

Canadian Institute of Timber Construction (C.I.T.C.)
100 Bronson Avenue
Ottawa, Ontario
K1R 6G8

Canadian Standards Association (C.S.A.)
178 - Rexdale Boulevard
Rexdale, Ontario
M9W 1R3

Interior Lumber Manufacturers Association (I.L.M.A.)
295 - 333 Martin Street
Penticton, British Columbia
V2L 2K1

Western Plywood Manufacturers Association (W.P.M.A.)
McLennan Ross and Company
6th floor - 12220 Stony Plain Road
Edmonton, Alberta
T5N 3Y4

APPENDIX 2

SELECTED METRIC (SI) UNITS AND CONVERSION FACTORS

Imperial	Metric (SI)
1 inch	2.54 cm
1 mile	1.609 km
1 acre	0.405 ha
1 square mile	2.590 km ²
1 cord (85 ft ³ solid wood)	2.407 m ³
1 ft ³	0.028 m ³
1 cunit (100 ft ³)	2.832 m ³ (roundwood)
1 ton (2000 lb)	0.907 t
1 cord (stacked) per acre	8.956 m ³ (stacked)/ha
1000 bd ft	4.29 m ³ (roundwood)
1 bone dry unit wood chips (2400 lb), BDU	1090 kg
1 ft ² of sheet product (1/2" basis)	1.180 m ² (1 mm basis)
1 ft ² of sheet product (1/16" basis)	0.147 m ² (1 mm basis)

SOURCE: Environment Canada. 1974. Selected metric (SI) units and conversion factors for Canadian forestry. Canadian Forestry Service, unnumbered.

Conversion factors for timber products

These factors are approximate values and may vary depending upon tree size, manufacturing practice, species, etc.

1 cunit (100 ft ³)	=	660 fbm (roundwood)
Grade #1 railway ties (7" X 9" X 8')	=	38 fbm
Grades #2, #3 railway ties (6" X 8" X 8')	=	28 fbm
1 bundle (50 pieces) of lath	=	9 fbm
