FRDA :

The Canada-Saskatchewan Forest Resource Development Agreement recognizes that the forest industry contributes significantly to the economic strength and diversification of the Saskatchewan and Canadian economies. The agreement strives to:

- a) assist the development and maintenance of timber supplies to ensure the long term viability of the forest industry in Saskatchewan.
- b) assist in the efficient utilization of the forest resource in Saskatchewan.
- c) contribute to the economic development of the Saskatchewan forest sector including the improvement of employment and human resource development opportunities.

Preparation of this guide was supported by the Canadian Forestry Service, through its Prince Albert District Office. Funding was provided under the Canada - Saskatchewan Forest Resource Development Agreement (1984/1989). The actual preparation of the Directory was carried out by staff of the Saskatchewan Council of Independent Forest Industries in La Ronge. They are solely responsible for any errors or inaccuracies that the Directory may contain.

Explanatory Notes

Much of the information contained in this guide was obtained from the Saskatchewan Manufacturer's Guide, published by Saskatchewan Economic Development and Trade. That information has, however, been supplemented from data bases maintained by the Saskatchewan Council of Independent Forest Industries. In addition, each firm listed in the guide was contacted in June, 1988 to ensure that its listing was accurate.

Exporters, for the purposes of this guide, are defined as firms that export to other provinces in Canada as well as to other countries.

S.I.C. refers to the **Standard Industrial Classification**. This listing identifies the products manufactured in Saskatchewan by major industrial grouping as defined by the 1980 Standard Industrial Classification Manual. This manual is a publication of Statistics Canada. More detailed information on S.I.C. Coding can be found in Appendix 1.

The **B.O.S.S.** designation stands for **Business Opportunities Sourcing System**. This system provides information on companies and products on a Canada - wide basis. It is designed to bring buyers and sellers together in both domestic and international markets. Saskatchewan companies that are identified as B.O.S.S. registrants are included in this national data bank and are included in the B.O.S.S. publications and catalogues.

APPENDIX I

Secondary Wood-using Industry Classification

This study uses Statistics Canada's four digit Standard Industrial Classification (SIC) code to classify firms in the secondary wood-using industry.

The SIC code groups the industrial classes according to a primary activity structure--"a division". The division within which the secondary wood-using industry is found is division E, the Manufacturing Industries. The second level is the "Major Group" which represents an aggregation of industry groups forming a recognizable sector of the economy. The secondary wood-using industry includes parts of three major groups: 25 - Wood Industries, 26 - Furniture and Fixture Group, and 27 - Paper and Allied Products Industries. The third level is the "Industry Group" which associates industrial classes having relatively broad families of outputs.

The secondary wood-using industry is composed of some ten industry groups (e.g., 254 - Sash, Door and Other Millwork Industries, 256 - Wooden Box and Pallet Industry ... in Major Group 25 - Wood Industries). The fourth level, the "Industry Class" (e.g., 2541 - Prefabricated Wooden Buildings Industry ... in industry group 254 - Sash, Door and Other Millwork Industries) represents the industries as identified. The secondary wood-using industry includes some 20 separate industry class four digit SIC codes as follows.
