## ACKNOWLEDGEMENTS

The compiler wishes to acknowledge the basic contribution made to the production of this index by the Computing and Applied Statistics Directorate of the Department of the Environment and, in particular, the work of Mr. B.F.J. Cabana of that Directorate. Special thanks are extended to Miss Mercedes Valencia and Miss Vicki Metcalfe who attended to the exacting tasks of identifying, sorting, checking, and coding contributions. For the helpful cooperation extended at all times by the Department of the Environment Library, special thanks are also due. The work of Mr. P.A. Landry, Forestry Information Section, on matters pertaining to French contributions is gratefully acknowledged.

## A BRIEF NOTE TO THE USER

Perhaps the very suggestion of a computer printout as an aid to locating a published work is enough to stir a vague (or maybe not so vague) feeling of apprehension. Does one need a short course in computer science to make the thing work? How long will it take to get the hang of it?

Well, certainly, it is different from other indexes, but a knowledge of computers, computer programs, and so on is definitely not needed. As to the time it will take to master its use; it would be nice to be able to say, "Just pick it up and use it. Everything will fall into place as you go along." But it is not quite as simple as that. You will need to read and understand the following section, How to Use the Index. The reading will take several minutes. The understanding may take a little longer as you follow through with a few examples. Let's say an investment of up to 10 minutes of your time is required for you to grasp the working essentials.

In due course, a reading of the section, About the Index, is recommended. This will give you useful details and background not covered in, How to Use the Index.

## REMERCIEMENTS

Le compilateur désire remercier la Direction générale de la statistique appliquée du ministère de l'Environnement pour ses travaux de base en vue de la production de cet index, et, en particulier un membre du personnel de cette Direction, M. B.F.J. Cabana. Il remercie spécialement aussi Mlles Mercedes Valencia et Vicki Metcalfe qui ont effectué les travaux délicats d'identification, de classification, de vérification et de codification des données. Au personnel de la Bibliothèque du ministère de l'Environnement, pour sa précieuse collaboration de tous les instants, il doit aussi des remerciements spéciaux. Le travail de M. Pierre A. Landry, de la Section de l'information sur les forêts, sur les articles en français, lui fut aussi très utile.

## BRÈVE NOTICE AU LECTEUR

La suggestion qu'un index soit imprimé avec un ordinateur dans le but de trouver une référence bibliographique peut inspirer une vague (ou pas tellement vague) impression d'anxiété. Le lecteur doit-il suivre un cours sur les ordinateurs avant de comprendre les mécanismes de l'index? Pourrait-il tout comprendre rapidement?

Certes, cet index est différent des autres, mais une connaissance des ordinateurs et de leur programmation n'est pas du tout nécessaire. Pour ce qui est du temps qui sera consommé à apprendre à s'en servir, nous aimerions pouvoir dire: «Vous pouvez l'utiliser immédiatement. Tout se tassera bien à mesure que vous avancerez». Mais le cas n'est pas si simple. Vous devez lire et comprendre la section ci-dessous, intitulée «Comment utiliser l'index». La lecture de cette section prendra plusieurs minutes, et la compréhension totale peut être un peu plus longue à venir à mesure que vous consultez quelques exemples. Disons que vous devez prendre jusqu'à 10 minutes de votre temps avant de pouvoir saisir l'essentiel.

En temps et lieu, vous pourrez aussi lire l'autre section intitulée: «Renseignements sur l'index», qui vous fournira des détails et un arrière-plan que ne contient pas «Comment utiliser l'index».

## HOW TO USE THE INDEX

To avoid confusion, the term publication refers, throughout the index, to the title of a serial, periodical, book, or formally published work of a congress, conference, symposium, colloquium, etc., An article appearing in a publication is referred to as a contribution.

### What are you looking for?

- An author or co-author? . . . . Look under AUTH. in the Keyword Index starting on page 54, Volume 2.
- A subject? . . . . . Look for title keywords in the Keyword Index volumes.
- A species? . . . . . Look for common and scientific names (English and French) in the Keyword Index volumes.

In the Keyword Index the keyword is found at the left margin of the page. Starting at the keyword, the contribution title continues to its end which is marked by a diamond <> sign. Any part of the title (including author or co-authors) which would normally precede the keyword now follows. This portion always starts with the prefix AUTH. linked to an author's or co-author's name.

Once the required title is located, proceed to its reference coding at the right of the page. An example will help here. The coding

AADN - 67/099/0005/0482-0486 (0001) translates as follows:

AADN = Title of publication. The four-letter code is solved by referring to the Key to Publication Titles, Volume 7. In this case AADN = Canadian Entomologist.

67 = Year of publication, 1967.

099 = Volume of publication, 99.

0005 = Issue number, 5.

0482-0486 = Opening and closing page numbers, 482-486. (If no closing page number is recorded, the pagination is discontinuous.)

(0001) = Computer sequencing number - *disregard*.

An abbreviated key is found at the head of the reference coding on each page.

Publications listed in the Key to Publication Titles often have additional information appended. Full use should be made of this material when submitting a reference request to a library.

To check whether or not a certain publication is included in the index please consult the section, Publications Indexed starting on page 7, of this volume. An asterisk appearing after a title indicates that additional information about it is available by entering the Key to Publication Titles at the corresponding four-letter code. Publications specifically excluded from the index are listed in the section, Publications not Indexed starting on page 42.

So far so good? Next, there is a slight complication brought about by the tendency of federal (and other) government departments, branches, etc., to reorganize and

## COMMENT UTILISER L'INDEX

Pour éviter toute confusion, le terme publication renvoie, d'un bout à l'autre de l'index, à la contribution, au périodique, au livre ou aux comptes-rendus publiés d'un congrès, d'une conférence, d'un symposium, colloque, etc. Et un article paru dans une publication est appelé une contribution.

### Que cherchez-vous?

- Un auteur ou un co-auteur? . . . Regardez sous AUTH. dans l'index des mots-clés qui débute à la p. 54, vol. 2.
- Un sujet? . . . . . Cherchez les mots-clés des titres dans les volumes de l'index des mots-clés.
- Une espèce? . . . . . Cherchez les noms communs et scientifiques (français et anglais) dans les volumes de l'index des mots-clés.

Dans l'index des mots-clés, le mot-clé se trouve à la marge de gauche. Depuis le mot-clé, le titre de la contribution se continue jusqu'à sa fin qui est indiquée par un losange <>. Puis, toute partie du titre (incluant le nom de l'auteur ou des co-auteurs) qui normalement précéderait le mot-clé, est maintenant donnée. Cette portion débute toujours par le préfixe AUTH. qui précède le nom de l'auteur ou des co-auteurs.

Après que le titre est trouvé, consultez le numéro de code de référence à droite de la page. En voici un exemple. Le numéro de code

AADN - 67/099/0005/0482-0486 (0001) se déchiffre comme suit:

AADN = titre de la publication. La solution est donnée à la clé des titres des publications, au volume 7. Dans ce cas, AADN = Canadian Entomologist.

67 = Année de publication, 1967

099 = Volume de la publication, 99

0005 = Numéro de la revue, 5

0482-0486 = Pages du début et de la fin de l'article, 482-486. (Si on ne donne pas de page de la fin, la pagination est discontinuée).

(0001) = nombre séquentiel de l'ordinateur: ignorer ce nombre.

Une clé abrégée se trouve à la tête du code de référence en haut de chaque page.

Après les noms des publications énumérées dans la clé des titres de publications, certaines informations additionnelles sont souvent données, que l'on doit fournir lorsque l'on fait une demande de prêt à une bibliothèque.

Pour vérifier si une certaine publication est énumérée ou non dans l'index, prière de consulter la section des publications indexées, (voir page 7 de ce volume). Un astérisque après le titre veut dire que certaines informations pertinentes sont disponibles en se référant à la clé des titres de publications correspondant au chiffre en code de quatre

change their names with a frequency that would have bewildered even Petronius Arbiter, perhaps the first recorded observer of this phenomenon.

Libraries use department and other branch or establishment names as secondary identification (after "Canada") for federal departmental publications. When these names change, so do the publication titles. All of which is a bit confusing for the user who readily identifies with, say, the Silvicultural Research Note series and feels he should be able to find all items in the series under one easily recognized title. For this reason, all federal departmental publications in this index are identified first by the prefix DEPT. PUB.- followed by what it is hoped is a generally accepted series title.

While this may be helpful to the user, it may well prove less than useful to a library unacquainted with the index. To get over this difficulty, your cooperation is needed on one final point. If you turn up a title to a departmental publication in the Key to Publication Titles which has one or more subtitles starting with the word *use*, would you please use the subtitle appropriate to the contribution you are seeking when you submit a reference request to a library. Details on interpreting departmental publication subtitles will be found on page 5 in the section, About the Index.

And that is it. Not, unfortunately, automatically operational, but hopefully understandable.

### ABOUT THE INDEX

This index is designed to provide reference to Canadian federal government scientific and technical contributions to forestry literature from 1901 to 1971, inclusive. Material included has been gleaned from lists of contributions, collections of reprints, and library holdings. Every effort has been made to check back to the original published contribution to ensure that authors, titles, and references are accurately recorded.

Despite the exhaustive search for material which has been made it is inevitable that some contributions will have escaped notice. The compiler is anxious that such omissions be drawn to his attention so that missing items can be traced and included in future editions.

The essential working part of the index consists of the volumes containing the Keyword Index and the Key to Publication Titles. The method of operation has been outlined in the section, How to Use the Index.

Certain common words appearing in a contribution title have little or no value in assisting the user to identify a specific article. The computer program is designed to prevent such words from appearing as keywords but at the same time it retains them within the titles. A list of common words which do not appear as keywords commences on page 54 of this volume.

Throughout the index, certain word combinations are hyphenated. These may or may not be hyphenated in the

lettres. Les publications expressément exclues de l'index sont énumérées dans la section Publications non indexées (voir page 42).

Jusqu'ici, ça va? Ensuite, survient une légère complication du fait de la tendance du gouvernement fédéral (et d'autres) à changer le nom de ses ministères, ses directions, etc. suivant une fréquence qui aurait étonné Petronius Arbiter, qui fut peut-être le premier à observer ce phénomène.

Dans les bibliothèques, pour identifier les publications des ministères fédéraux, on utilise secondairement (après «Canada») les noms des ministères et des directions générales, etc. Lorsque ces noms sont changés, les titres des publications changent automatiquement. Une telle pratique apporte un peu de confusion pour le lecteur qui est habitué à telle série, disons les «Notes de recherches en sylviculture» alors que subitement deux séries différentes sont formées. Pour cette raison, toutes les publications des ministères fédéraux énumérées dans cet index sont d'abord identifiées par le préfixe DEPT. PUB., suivies par, espérons-le, un titre de série généralement accepté.

Cette pratique sera peut être utile au lecteur mais il se peut qu'elle gêne la bibliothèque qui ne connaît pas l'index. Afin de contourner cette difficulté, nous avons besoin de votre coopération. Si vous dénîchez un titre de publication de ministère dans la clé des titres de publications qui a plus d'un sous-titre commençant par le mot «use» (utilisez), prière d'utiliser le sous-titre qui va avec la contribution que vous cherchez, lorsque vous demandez un prêt à la bibliothèque. Vous trouverez des informations détaillées sur la façon d'interpréter les sous-titres de publication de ministères dans la section ci-dessous intitulée «A propos de l'index».

Et voilà. Malheureusement tout n'est pas automatique mais nous espérons que ce soit compréhensible.

### À PROPOS DE L'INDEX

Cet index a été mis au point afin de fournir des références sur les contributions scientifiques et techniques du Gouvernement fédéral canadien dans le domaine de la foresterie, de 1901 à 1971 inclusivement. Il résulte de compilations à partir de diverses listes de contributions, de collections de tirés à part et de fonds de bibliothèques. On s'est efforcé de vérifier les contributions telles que publiées afin de s'assurer que les auteurs, les titres et les références fussent exacts.

Malgré nos recherches intensives, il est certain que quelques contributions ont été oubliées. Le compilateur désire qu'on lui signale ces omissions afin que les contributions qui manquent soient ajoutées aux prochaines éditions de l'index.

Les parties essentielles de l'index sont les volumes qui contiennent l'index des mots-clés et la clé des titres

original title, and, in addition, a hyphenated form in the original title may appear as separate words in the index. The computer recognizes two or more hyphen-linked words as a single word and judicious use of the hyphen provides a more flexible extension of the common word list. The word BORER, for example, cannot be included in the common word list because it is a significant keyword with respect to insects. However, where it appears in the combination, INCREMENT BORER, it would be virtually useless as a keyword, and its appearance as such is conveniently suppressed by the use of the hyphenated form, INCREMENT-BORER.

Hyphenated words appear in the Keyword Index only after all unhyphenated entries for the first word of the combination are recorded. The keyword FOREST-MANAGEMENT-INSTITUTE is found *after the last entry for FOREST*. If the user fails to appreciate this point he may seek for FOREST-MANAGEMENT-INSTITUTE at the start of the keyword, FOREST, or even in the area of FOREST MANAGEMENT. This could result in a reference being missed, particularly where a keyword is repeated extensively and the hyphenated entries do not appear on the same page.

Needless duplication in the presentation of scientific names is avoided by linking words with periods and, in some cases, with opening and closing brackets. For example, carbon dioxide appears as CARBON. DIOXIDE and *Systemma acicola* (Dearn.) Wolf and Barbour appears as the one word, SYSTEMMA. ACICOLA (DEARN.) WOLF. AND. BARBOUR.

In all cases of unhyphenated multiple surnames of authors (e.g. L.A. de Grace, C.E. Van Wagner) the two parts of the name are run together. L.A. de Grace becomes AUTH. DEGRACE. L.A. and C.E. Van Wagner becomes AUTH. VANWAGNER. C.E.

Because an author's name may not always be published in the same form, care should be exercised in making an author search, especially where the commoner surnames are concerned. For example, in the Keyword Index there are 20 entries for AUTH. BROWN. C.E. and one entry for AUTH. BROWN. CLIFFORD. E. Both of these names refer to the same author but are physically separated by two entries for AUTH. BROWN. C.S.

To avoid confusion, spelling of contribution title words has been changed where necessary to conform to Webster's Dictionary. Apart from these modifications, perhaps a dozen particularly lengthy contribution titles were condensed to conform to the requirements of the computer program. In most instances this was accomplished by the removal of common words. For the very few remaining cases where further reductions were needed, care was exercised to retain the sense and usefulness of the original titles.

Many publication titles consist of a generic word followed by the name of an issuing body. For such titles in the index, the order is reversed and the generic name follows that of the issuing body.

des publications. La méthode d'opération fut décrite dans la section «Comment utiliser l'index».

Certains mots communs faisant partie des titres des contributions ne servent que peu à l'identification des articles. La programmation de l'ordinateur fut telle que ces mots ne paraissent pas comme mots-clés bien que, évidemment, ils paraissent à l'intérieur du titre. On trouvera la liste de ces mots à la page 54 de ce volume.

Cà et là dans l'index, on trouve des mots joints par un trait d'union. Dans le titre ils ne l'étaient peut-être pas et, de plus, des traits d'union dans le titre original peuvent avoir été éliminés dans l'index. Nous considérons comme un seul mot les mots joints par un trait d'union; le choix judicieux de traits d'union permet d'allonger la liste des mots communs. Par exemple le mot BORER est un mot important en entomologie et de ce fait on ne peut l'inclure dans la liste des mots communs. Par contre, lorsqu'il apparaît dans l'expression INCREMENT BORER, il serait virtuellement inutile comme mot-clé et on peut l'adjoindre pour créer INCREMENT-BORER.

Les mots composés avec un trait d'union paraissent dans l'index des mots-clés après tous les mots non composés formés du premier mot. Ainsi le mot-clé FOREST-MANAGEMENT-INSTITUTE se trouve après la dernière entrée de FOREST. Si le lecteur ne se rend pas compte de ce fait, il pourrait chercher FOREST-MANAGEMENT-INSTITUTE ailleurs, par exemple au début des FOREST ou à FOREST MANAGEMENT. Il pourrait de ce fait manquer ce qu'il cherche, surtout lorsque un mot-clé couvre une page complète et que les mots à trait d'union se trouvent à la page suivante.

La répétition inutile de portions de noms scientifiques fut évitée en soudant ensemble les diverses parties du nom par des points ou parfois des parenthèses. Par exemple, carbon dioxide devient un seul mot: CARBON. DIOXIDE et *Systemma acicola* (Dearn.) Wolf and Barbour est fondu en le seul mot SYSTEMMA. ACICOLA (DEARN.) WOLF. AND. BARBOUR.

Pour les auteurs dont les noms sont précédés d'une particule (e.g. L.A. de Grace, C.E. Van Wagner), celle-ci a été incorporée au nom. L.A. de Grace devient AUTH. DEGRACE. L.A. et C.E. Van Wagner devient AUTH. VANWAGNER. C.E.

Vu que le nom d'un auteur n'est pas toujours publié uniformément, on devra chercher avec soin un auteur, surtout si le nom de famille est commun. Par exemple, AUTH. BROWN. C.E. paraît 20 fois mais on trouve aussi une fois AUTH. BROWN. CLIFFORD. E., bien qu'il s'agisse du même auteur.

Afin d'éviter toute confusion, l'orthographe des mots de certains titres fut corrigée pour la rendre conforme au dictionnaire Webster. Les limites de la programmation de l'ordinateur nous obligèrent à condenser certains titres très longs, environ une douzaine en tout. Dans la plupart des cas, seuls les mots communs furent enlevés. Lorsqu'il

e.g. JOURNAL OF THE ROYAL AERONAUTICAL SOCIETY becomes, ROYAL AERONAUTICAL SOCIETY. JOURNAL and ANNALS OF THE ENTOMOLOGICAL SOCIETY OF AMERICA becomes, ENTOMOLOGICAL SOCIETY OF AMERICA. ANNALS

Primary identification of university publications is by the name of the university while provincial government departmental publications are found under the name of the province.

The matter of handling Canadian federal government publications was touched upon briefly in the section, How to Use the Index. The Environmental Serials Information Services (ENSIS) of the Department of the Environment Library maintains a catalog (up-dated bi-monthly) of all serials and periodicals, including federal government publications, retained by the library. For the most part government publications are found in the ENSIS Catalog under the primary entry, CANADA. This is followed by a departmental, service, branch, or other establishment breakdown, and finally, there is the serial or periodical title (e.g. bulletin, technical note, etc.). This system takes note of all name changes of departments, etc., so that for a given serial there may be several valid publication titles in the course of its lifetime. Adoption of the ENSIS system for the index could be confusing for users unfamiliar with the history of departmental name changes. For this reason all federal government publications in the index have been assigned the common primary entry DEPT. PUB.-. This is followed by the serial or periodical title judged to have greatest common usage (e.g. Silvicultural Research Note, Forest Fire Research Leaflet, etc.) plus, in some cases, further information as to branch, or other establishment.

In the Key to Publication Titles most entries under DEPT. PUB.- have one or more subtitles commencing with the word *use*. These subtitles correspond to titles used in the ENSIS Catalog and show the ranges of serial numbers and publication years together with any prefixes or suffixes which may apply to the serial numbers. A look at the following item from the Key to Publication Titles may prove helpful as an illustration.

AAGW DEPT. PUB.- INFORMATION REPORT,  
BRITISH COLUMBIA REGION (PACIFIC  
FOREST RESEARCH CENTRE)  
*use* Canada. Forest Research Laboratory,  
Victoria, B.C. Information Report No. BC-  
X-1-57, 1965-1971//  
*use* Canada. Pacific Forest Research Centre,  
Victoria, B.C. Information Report. No.  
BC-X-58, 1971-

The first subtitle shows that the issue number is prefixed by BC-X- and that the range in numbers is from 1 to 57 over the period 1965 to 1971. The parallel slashes mean the cessation of the serial under the subtitle given. The second subtitle shows the name change that became effective with

fallait enlever aussi des mots importants, on tenta de conserver le sens et l'utilité du titre original.

Plusieurs titres sont formés d'un terme générique suivi du nom de l'institution. Dans l'index, on a changé l'ordre de présentation: le terme générique vient après le nom de l'institution.

e.g. JOURNAL OF THE ROYAL AERONAUTICAL SOCIETY *devient* ROYAL AERONAUTICAL SOCIETY. JOURNAL et ANNALS OF THE ENTOMOLOGICAL SOCIETY OF AMERICA *deivent* ENTOMOLOGICAL SOCIETY OF AMERICA. ANNALS.

Les publications universitaires sont d'abord identifiées par le nom de l'université tandis que celles des ministères des gouvernements provinciaux débutent avec le nom de la province.

Pour ce qui concerne les publications du gouvernement fédéral canadien, nous en avons un peu parlé dans la section «Comment utiliser l'index». Les Services d'information sur les périodiques sur l'environnement (ENSIS) de la bibliothèque du ministère de l'Environnement tiennent à jour bimestriellement un catalogue de tous les périodiques et de toutes les séries, incluant les publications du gouvernement fédéral, rangés à la bibliothèque. La plupart des publications du gouvernement fédéral dans ce catalogue sont indexées après l'entrée CANADA, suivi du nom du ministère, du service, de la direction, etc., et finalement parait le titre du périodique (e.g. bulletin, note technique, etc.). Ce système signale les changements de noms des ministères, etc., de sorte que de tout périodique, on peut noter plusieurs titres valides avec les années. Dans notre index, l'adoption du système ENSIS aurait pu apporter de la confusion, et, pour cette raison, toutes les publications du gouvernement fédéral sont énumérées sous le titre DEPT. PUB.—, suivi du titre de périodique (ou de la série) le mieux connu (e.g. Silvicultural Research Note, Forest Fire Research Leaflet, etc.) outre, en certains cas, certaines informations supplémentaires telles que la direction, le service, etc.

Dans la clé des titres des publications, la plupart des entrées après DEPT. PUB.- présentent des sous-titres commençant par le mot *use*. Ces sous-titres correspondant aux titres utilisés dans le catalogue ENSIS et donnent la série de numéros de périodiques et d'années de publication en plus de tout préfixe ou suffixe qui peut se rapporter aux numéros des périodiques. Voici un exemple tiré de la clé des titres des publications:

AAGW DEPT. PUB.- INFORMATION REPORT,  
BRITISH COLUMBIA REGION (PACIFIC  
FOREST RESEARCH CENTER)  
*use* Canada. Forest Research Laboratory,  
Victoria, B.C. Information Report  
No. BC-X-1-57, 1965-1971//  
*use* Canada. Pacific Forest Research Centre,  
Victoria, B.C. Information Report. No.  
BC-X-58, 1971-

the issue of BC-X-58 in 1971. In all cases where the year is followed by a dash it means that the subtitle was valid as of 23 March 1973, based on that edition of the ENSIS Catalog.

When submitting a reference for a departmental publication to a library, the appropriate ENSIS subtitle (determined by the year or serial number range) should be quoted rather than the DEPT. PUB.- title adopted for ease of entry to the index. The reason for this is that the ENSIS Catalog titles follow a common system adopted by libraries for filing and recall.

To make the index more practical from a library viewpoint, all relevant ENSIS Catalog titles are included in the section, Publications Indexed, as primary entries and are assigned the same code as the corresponding DEPT. PUB.- in the Key to Publication Titles.

Contributions eligible for inclusion in the index are, ideally, those published, or prepared for publication, during the period of an author's employment by the Government of Canada. In doubtful cases, the policy has been to include contributions rather than exclude them.

Certain serials, periodicals, etc., containing departmental contributions have not been indexed and these exclusions are found in the section, Publications not Indexed, on page 42 of this volume.

Le premier sous-titre informe que le numéro du périodique a le préfixe BC-X- et que les numéros 1 à 57 parurent durant la période 1965-1971. Les traits parallèles indiquent la fin de la série intitulée du sous-titre donné. Le deuxième sous-titre informe que le changement de nom s'opéra avec le numéro BC-X-58 en 1971. Partout où l'année est suivie d'un trait d'union, le sous-titre était valide le 23 mars 1973, date du dernier catalogue ENSIS consulté.

Lorsque vous désirez emprunter d'une bibliothèque une publication de ministère fédéral, vous devez mentionner le sous-titre de l'ENSIS (déterminé par la série d'années et de numéros) plutôt que le titre sous DEPT. PUB.- qui n'a d'autre utilité que la facilité d'entrée dans l'index: les titres du catalogue ENSIS se conforment à un système adopté communément par les bibliothèques pour les fins de rangement et classement.

Afin que notre index soit de consultation pratique pour les bibliothèques, tous les titres concernés du catalogue ENSIS sont inclus dans la section «Publications indexées», sous forme d'entrées primaires et nous leur avons donné les mêmes chiffres de code que les DEPT. PUB.- correspondantes dans la clé des titres des publications.

Idéalement, seules les contributions publiées ou à être publiées durant le temps qu'un auteur est à l'emploi du Gouvernement du Canada, peuvent être incluses dans l'index. Cependant, dans certains cas douteux, nous les avons incluses dans l'index plutôt que les exclure.

Certaines séries et certains périodiques, etc., qui publient des contributions de ministères fédéraux, n'ont pas été indexées. Elles sont énumérées au titre Publications non indexées, page 42 de ce volume.

PUBLICATIONS NOT INDEXED

Exclusions from the index are presented in two categories. The first of these is a general listing of material excluded and the second covers specific departmental serials and periodicals which are not indexed. For the most part, the second category covers serial and periodical titles listed in the ENSIS Catalogue of Titles published by the Department of the Environment Library on 23 March 1973.

General Exclusions

1. Material classified as general public information.
2. Material published in annual reports. This includes contributions to departmental annual reports, the Annual Report of the Forest Insect and Disease Survey, Canadian Institute of Forestry Annual Reports, provincial government departmental annual reports, etc..
3. Material published in the Canada Year Book and the handbook, Canada.
4. Material prepared for, or presented at conferences, symposia, colloquia, seminars, etc., and not formally published by the sponsoring body. However, where contributions have been formally published as separates rather than in a publication of the sponsoring body, such items have been indexed. Contributions to the British Empire Forestry Conferences are examples.
5. Unnumbered mimeographs are excluded as well as several numbered mimeographed series. The latter are itemized in the second category hereunder.
6. Progress and interim reports. Included in this group are unnumbered information and interim reports on entomology and pathology originating with various federal regional forest research establishments.
7. All reviews and abstracts.

Departmental Serial and Periodical Exclusions

1. Annual Project Statements

This group covers annual project statements originating with forestry establishments such as the Chemical Control Research Institute and the former Forest Research Laboratory in Calgary, Alberta.

2. Annual, Semi-annual, Quarterly, and Summary Reports

This group covers departmental annual reports; divisional, branch, etc. annual reports; quarterly and semi-annual reports of the Ottawa Forest Products Laboratory; and summary reports related to the Forest Insect and Disease Survey in various regions.

3. Bibliography of Articles in Forestry and Related Subjects

Canada. Dept. of Forestry. Library. Bibliography of articles in forestry and related subjects as published by the centralized title service and arranged by Oxford classification numbers. Ottawa. Irregular. No. 1 - 31?, 1957? - 1962?//
