## INTRODUCTION

There is an ever-increasing need for a bibliography of literature pertaining to forestry in Canada. The purpose of this bulletin is to assemble, classify and index the more important references listed in the library of the Dominion Forest Service, supplemented by references provided by Provincial Forest Services, the Canadian Pulp and Paper Association, and other organizations, and extracted from periodicals and trade magazines.

It is realized that there may be many other publications on Canadian forestry not listed in the library of the Dominion Forest Service. Particulars of such would be welcomed so that they might be included in any revision of this bibliography.
