Year in Review

Introduction

The First Nations Forestry Program (FNFP) is the federal government's principal capacity-building program for First Nations forestry. Jointly funded by Natural Resources Canada (NRCan) and Indian and Northern Affairs Canada (INAC), the FNFP supports research, outreach activities and capacity building partnership projects that enhance First Nations' ability to manage forest resources and participate in economic opportunities both on and off reserve.

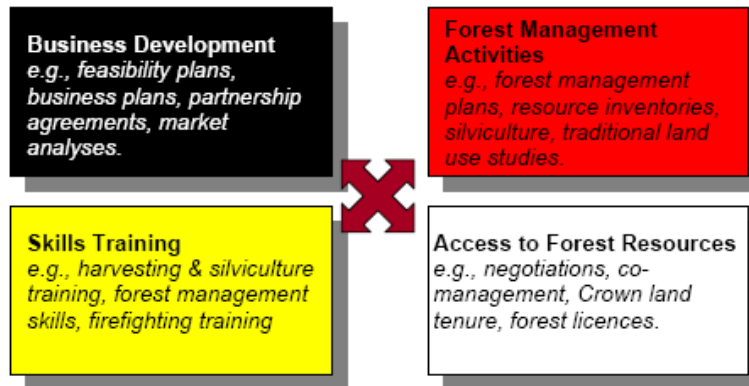

2007-08 Program Highlights

- 148 community-based partnership projects were funded in forest management, forest-based business development, skills development and access to forest resources.
- FNFP contributed \$3.7 Million towards total project funding totalling \$12.5 Million in cash and in-kind support.
- One regional-scale partnership initiative, the multi-year New Brunswick Aboriginal Forestry Initiative, continued to receive FNFP funding and in-kind support in 2007-08.
- FNFP participated in 7 major outreach events across Canada, including the Council for the Advancement of Native Development Officers (CANDO) 14th National Conference which took place in Kamloops, BC from October 22 - 25, 2007.
- Two research studies were funded by the FNFP: "A National Vision of First Nation Forestry in 10 Years" and "Trends in Aboriginal Forestry".
- A visioning exercise, involving First Nations forestry practitioners was initiated with the objective of defining a shared vision and collective priorities to guide the program's future direction.

FNFP Business Lines

The FNFP assists First Nations to increase their participation in the forest sector by providing funding in four major interrelated business lines as shown below:

FNFP Business Lines

Forest Management Activities

The majority of First Nations are at the developmental stage in forest management capacity. The FNFP provides funding for developing tools and initiatives that increase forest management capacity: forest management plans, forest inventory assessments, traditional land-use studies, on-reserve forest management initiatives including silviculture and forest stand improvement activities. Two examples of Forest Management Activity projects from 2007-2008 include the Haida Tribal Society's Forestry Monitoring Program (BC) and Goodfish Lakes' Reforestation Program (AB).

Business Development

Many First Nations are also seeking greater participation in and benefits from the forestry sector through forest-based business opportunities on and off reserve. FNFP provides funding support for forest-based business feasibility studies, market analyses, and business planning. Two business development project examples for 2007-2008 include the Chawathil Sawmill Analysis, Design and Business Plan (BC) and the Coast Forest Management Ltd.'s Alternative Energy Solutions Feasibility Study (BC).

Skills Training

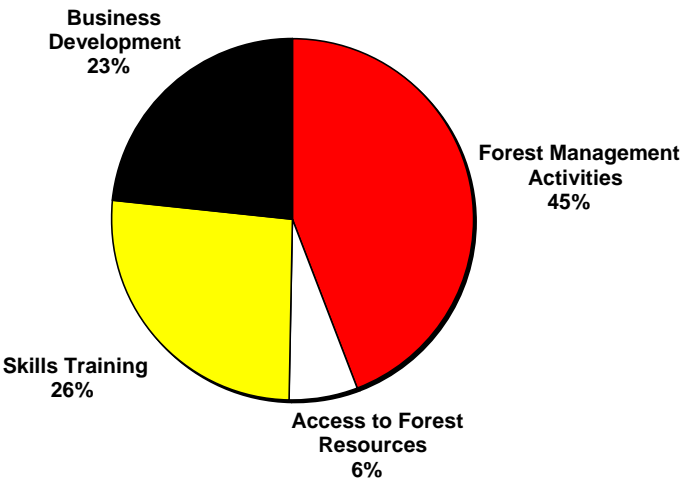

There is still a significant gap between First Nations and other Canadians in terms of employment and income. Forestry and logging remains a primary source of employment and income for First Nations, relative to the overall Canadian labour force. To enhance First Nations employment in the forest sector, many First Nations require skills training in, for example, stand tending, harvesting, forest mapping, forest inventory, and sawmill operations. The FNFP helps fund these forest sector specific training activities. Two examples of skills training projects for 2007-2008 are the Meadow Lake Tribal Council's 'School to Work' program (SK) and Berens River First Nations' Square Timber House project (MB).

Access to Forest Resources

FNFP supports First Nations to increase their access to forest resources by providing funding to support background research for provincial forest licence applications and forest tenure mapping. Two examples of access to forest resources projects in 2007-2008 consist of the Katzie Communities' Forest Acquisition Initiative (BC) and Pic Moberts' Access to Forest Operations Strategy (ON).

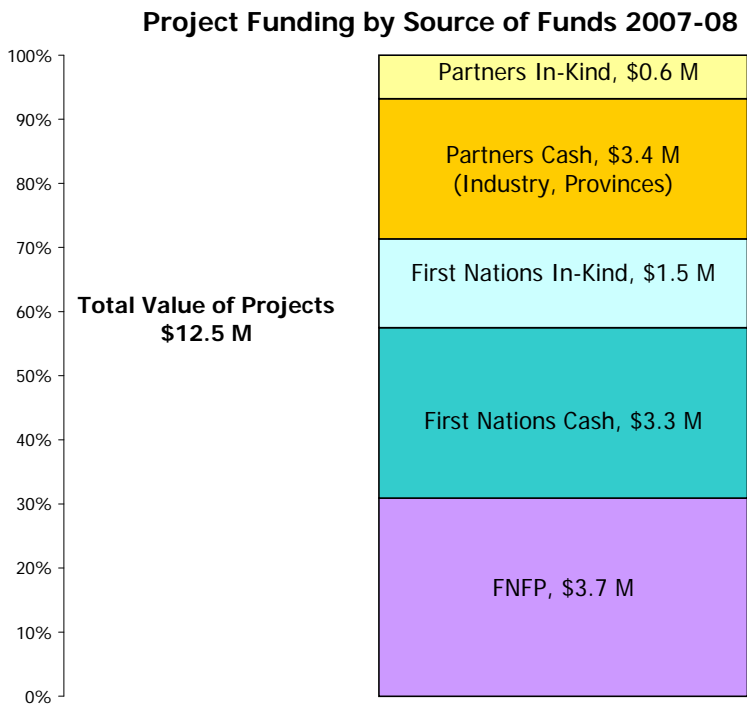

Community Projects

In 2007-08, 254 submissions were received for FNFP funding; of which 148 were approved resulting in an approval rate of 58%. There were 61 qualified but unfunded projects, due to limited available budgets. Funding by business line is shown below:

Funding from First Nations and Partners

FNFP contribution expenditures for projects in 2007-08 totalled \$3.7 million. Projects receiving FNFP funding must have additional financial support from participating First Nations. Many projects also receive funding from other sources such as the forest industry, provincial and territorial governments, and other federal agencies. The majority of FNFP funding is exceeded by cash and in-kind support from First Nation proponents and partners. In 2007-08, the total value of projects was \$12.5 million. Figure 1 shows sources of funding for FNFP projects.

Regional Initiatives

In 2007-08, the FNFP provided \$97,275 in funding for the New Brunswick Aboriginal Forestry Initiative, which is a major training and job placement partnership involving HRSDC's Aboriginal Skills and Employment Partnership program, the Province, the NB forest industry, and First Nations. The initiative is valued at \$4 million over five years, including the FNFP multi-year funding commitment of \$270,000. By April 2008, over 460 workers have been trained, resulting in approximately 250 full-time seasonal and permanent job placements in the New Brunswick forest sector.

FNFP also provided funding and technical assistance to First Nations to help develop regional initiatives in other provinces including:

- The First Nations Natural Resources Youth Employment Program (FNNRYEP) in Ontario is a partnership involving 28 First Nation communities, industry and the provincial government which provides First Nation youth with an opportunity to gain experience in forestry and other natural resources sectors. The program provides First Nation youth with summer employment, as well as training and training certification relevant to the forestry and natural resource sectors. The Program's completion rate is over 90% with over 94% of the participants returning to school.
- FNFP also provided assistance to the Aboriginal Forest Industries Council to help create a successful Aboriginal Forestry Enterprise Roadmap. This project will develop a comprehensive business outlook document that will outline realistic, long-term growth opportunities for First Nations forest businesses in British Columbia. The template will incorporate market trends in the forest industry as well as current First Nations capacity in British Columbia.

First Nations Forestry Research

FNFP research studies in 2007-08 focused on strategic planning and sector trends to inform replacement programming directions for the current FNFP.

A National Vision for First Nation Forestry in 10 Years

Current FNFP program authorities expire in March 2009. To provide strategic advice on future options and directions, the program's National Council and Provincial-Territorial Management Committees (PTMCs) across the country have engaged in a "Visioning Exercise" on First Nations forestry. The objective of this exercise was to solicit views and develop consensus among First Nation forest practitioners on where First Nations forestry could/should be in ten years, what opportunities there are for forest-based communities, and what will be the measures of success to indicate when the vision has been realized. This exercise was led by Michael Anderson, a FNFP National Council member for Manitoba as well as a Manitoba PTMC representative, along with the assistance of Jack Smyth and John Doornbos of the Canadian Forest Service (CFS).

The final report of the visioning exercise was tabled with the National Council in winter 2008. The visioning exercise is a critical input to inform replacement programming for the FNFP.

Trends in Aboriginal Forestry

Over the past several decades, substantial change has taken place in Aboriginal forest-based communities across Canada. For First Nations, the forest land base has grown considerably as a result of land claims, treaty land entitlements and additions to reserves. There has also been a significant increase in the number of First Nations negotiating and managing provincial Crown land tenures, and in the availability and skill levels of Aboriginal youth to participate in the sector. These developments have contributed to a considerable increase in First Nations participation in all aspects of Canadian forestry, ranging from management of forest lands to employment in all sub-sectors of the industry, to growing business ownership.

At the same time, the Canadian forest sector is undergoing unprecedented transformative change, precipitated by offshore competition, forest pests such as the mountain pine beetle epidemic, and wildfires. These factors are driving a major restructuring and downsizing of the industry and a rethinking about forest management policy and practice. For forest dependent communities, their resilience and sustainability will depend on their ability to adjust to these challenges.

Accordingly, the First Nations Forestry Program in 2007-08 launched a baseline study to gain a more detailed perspective on Aboriginal involvement in the forest sector and on the evolving linkages between Aboriginal forest-based communities, provincial/territorial governments and the forest industry. The study will provide a “snapshot” of important trends in three areas: Aboriginal participation in the forest sector; emerging forest-based opportunities for Aboriginal communities; and trends in Aboriginal capacity in forestry. It will be both qualitative and quantitative, and be based on existing statistical information. The study will also recommend indicators to track trends over time in the state of Aboriginal forestry.

This report is expected to be completed by late fall, 2008.

FNFP Communications and Outreach

Communications and outreach activities in 2007-2008 focussed on increasing visibility of the program with federal, provincial and First Nations policy and decision makers, as well as with First Nation forest practitioners and their industry project partners.

A) Outreach - Events

In 2007/2008, FNFP participated in seven major events across Canada to showcase program projects and best practices. The events took place in Atlantic Canada, Quebec, Ontario, the Prairie Provinces and British Columbia, reaching a broad spectrum of forest sector participants.

One such event was the 14th Council for the Advancement of Native Development Officers (CANDO) Annual conference which was held on October 22-25, 2007 in Kamloops, British Columbia. FNFP provided financial support for this national conference that offers participants the opportunity to gain practical knowledge about tools and strategies for economic development. FNFP organized a successful field excursion in conjunction with the Kamloops Indian Band, NRCan’s Minerals and Metals Sector, New Gold Inc., Tolko Industries and T’Kumluup Forestry Development Corporation to introduce conference delegates to regional mining sites and forestry operations.

The FNFP also supported and attended various events. For example, FNFP staff participated in and made a presentation at a federal-provincial workshop in Toronto entitled “Public Sector Support for Aboriginal Community Involvement in the Forest Sector” in October 2007. The intent of the workshop was to facilitate improved collaboration among federal departments and Ontario provincial ministries in the area of Aboriginal community capacity building needs in forest resources management/sustainable development by sharing information, identifying capacity issues and needs and the development of an action plan as warranted. The workshop was jointly arranged by Ontario FNFP and the Ontario Ministry of Natural Resources staff.

Youth Events

Funding from the FNFP has helped the First Nations of Quebec and Labrador Sustainable Development Institute (FNQL-SDI) to offer training to First Nations youth and to develop tools including reference guides on Aboriginal forest harmonization and forest certification. Other FNFP projects the institute has undertaken have assisted the Institute to establish criteria and indicators of sustainable forest management from a First Nation’s perspective. Solid support from the FNQL-SDI and FNFP over the last four years has helped to guide First Nations forest communities in Quebec and Labrador toward realization of their specific sustainable development goals.

B) Outreach - Publications

Two new national reports were produced: *Major Forest Sector Issues and Initiatives and their Impact on Aboriginal Communities* and *A quantitative Assessment of Aboriginal Involvement in the Canadian Forest*. Both reports explore Aboriginal involvement in the Canadian Forest Industry. *The Forestry Chronicle*, a highly regarded national forest sector journal, published five FNFP articles over the course of the fiscal year. Two examples: “A 'Forestry Toolbox' For Quebec First Nations Communities” (May-June 07) and “Learning From Our Aboriginal Partners” (Jan-Feb 08). Several FNFP projects were also featured in regional and national newsletters. Editions of the FNFP E-news e-publication was widely distributed electronically and can be viewed by visiting cfs.nrcan.gc.ca/subsite/fnfp.

Project Audits

To ensure that FNFP expenditures comply with the objectives and terms and conditions of the program, four project recipients are audited annually in accordance with an approved risk audit methodology. In 2007-08, four projects from the previous fiscal year were audited by independent auditors: N'Quatqua Logging Co. Ltd. (BC), Nibinamik First Nation (ON), Miawpukek First Nation (N&L), and Ahtahkakoop Cree Nation (SK).

While the audit of these projects revealed general compliance with the terms of the contribution agreement, some minor improvements were recommended. As a result of the audits, a number of process actions are being taken to improve tracking and itemizing of expenses by recipients.

Mountain Pine Beetle Initiative – First Nations Element

In 2007/08 the MPBI First Nations Element provided funding of \$2.2 million for 50 projects involving 39 First Nations. The projects focused on MPB control treatments (MPB management strategies, ground surveys, treatment prescriptions, fall and burn, sanitation harvesting, salvage harvesting, and baiting) and MPB site rehabilitation activities and treatments (site preparation, seedling acquisition, planting, etc.). Forty-one of the 50 funded projects also included completion of forest fuel management activities to mitigate risks from wildfires and protect community core areas. During the year, forest fuel management activities involved the identification of treatments areas, thinning, pruning, fuel reduction and removal, planting, and the creation of fire and fuel breaks.

Looking Ahead

Since its inception in 1996, the First Nations Forestry Program has been a valued partnership platform to advance First Nation capacity in forest management and to assist First Nations to access forest-based economic opportunities on and off reserve. Over the past 11 years, the FNFP has funded almost 2,100 capacity-building projects in 600 First Nations communities, in partnership with First Nations, industry and provincial/territorial governments. Over this time, the FNFP has contributed \$51 million to partnership projects worth \$179 million in total. The resulting increase in capacity is evidenced by First Nations that have received sustainable forest management certification for forest lands under their management, by First Nations assuming provincial forest management licences for large provincial forest tenures, and by First Nations businesses and workers contributing to Canada's forest sector.

While much has been achieved, much more remains to be done. The current FNFP program expires in March 2009. In the next ten years, forestry-based opportunities will remain a key source of wealth and well-being for many First Nation communities, precipitated by a growing First Nations' controlled land base, proximity to regional scale opportunities, and a willing and able First Nations youth labour force. Investments in capacity-building will be key to optimizing this opportunity.

The 2008-2009 fiscal year will be a transition year in which to take stock of changing priorities and opportunities, and to consider options for future Aboriginal forestry programming.

Annex 1 – List of Tables

Program Budget

In 2007-08, the total budget was \$ 6.5 million, with funding sources as shown in Table 1:

Table 1: FNFP Budget 2007-08

(\$ millions)	NRCan	INAC	Total
Contributions	1.000	2.875	3.875
Operating	0.75	0.375	1.125
Total FNFP	1.750	3.250	5.000
BC Mountain Pine Beetle Initiative – First Nations Element	1.500		6.500

The allocation of funds is shown in Table 2:

Table 2: FNFP Budget Allocations by Province and Territory 2007-08 (\$000s)

Province	Contributions	A-Base Salary	Operating Budget ¹	Total
BC	792.8	27.0	84.8	904.6
AB	372.2	20.0	40.8	433.0
SK	360.5	20.0	39.6	420.1
MB	275.3	20.0	30.8	326.1
ON	663.8	56.0	74.8	794.6
QC	531.9	52.0	60.8	644.7
NB	199.5	14.0	22.0	235.5
NL	40.3	1.75	0.2	42.25
NS	153.3	3.5	16.4	173.2
PE	10.3	1.75	0.2	12.25
NT	90.8	0.0	9.2	100.0
YT	98.2	0.0	0.0	98.2
HQ (CFS)	286.1	34.0	20.4	340.5
HQ (INAC)	0.0	125.0	250.0	375.0
Total	3,875	375.0	650.0	4,900

¹Reductions to Operating Budget include:

- \$52,000 per Sector Expenditure Review reduction
- Sunset Tax = \$97,000. HQ and regions will share \$48,000 as shown; HQ cover the balance (49,000 - not shown) out of HQ budget

FNFP Contribution funds are primarily allocated to projects that support First Nations participation in forestry predominantly at the community level. Contribution funds may also support First Nations organizations at national or regional levels.

Operating funds are used to support First Nations participation in program management, and First Nations forestry research and advocacy. This includes the program's comprehensive bilingual outreach and communications initiatives.

In addition, \$1.5 million was allocated to the First Nations Forestry Program under the Mountain Pine Beetle program in British Columbia in 2007-2008.

Number and Value of Projects

In 2007-08, 254 submissions were made to the FNFP, of which 148 were approved for funding resulting in an approval rate of 58%. The total value of the projects was over \$12 million. Table 3 shows the number and value of projects submitted and approved, by province or territory.

Table 3: Projects Submitted and Approved, Total Project Support 2007-08 *

	Projects Submitted		Projects Approved For Funding		
	Number of Projects	\$ Total Project Support	Number Of Projects	Approval Rate	\$ Total Project Support
BC	82	4,724,676	30	37%	1,096,690
