## **ACKNOWLEDGMENTS**

This directory is a product of the willingness of B.C.'s secondary manufacturers to provide information about their operations, products and markets. The support of these companies is appreciated.

The author wishes to recognize the contributions of Louise Wilson, Casey Van Kooten and Ilan Vertinsky in developing the information base for this directory. In addition, managing the data set for the large number of companies included was not an easy task and the help of Tony Lempriere, Mary Van Kooten and Pip White is gratefully acknowledged.

### **Funding Support**

The project to complete this directory received financial support through the Opportunity Identification Program, Canada-British Columbia Partnership Agreement on Forest Resource Development: FRDA II, a five-year program cost-shared by the federal and provincial governments.

### **Disclaimer**

The inclusion of products and companies does not necessarily imply any form of endorsement by the federal or provincial governments. In addition, the exclusion of products or companies does not necessarily imply the lack of endorsement.

Data Request Form

## INTRODUCTION

The information that was used to prepare this directory was assembled as part of a project to complete and analysis of the structure and significance of secondary manufacturing in the British Columbia forest industry. Based on this research it is estimated that B.C. secondary manufacturing generated about 14,000 direct jobs and \$1.94 billion in sales (1994 estimates)

The Directory to Secondary Manufacturing of Wood Products in British Columbia was completed to support the market development efforts of the B.C. industry. The forest products sector is increasingly competitive and better information does work to reduce the risk associated with market development.

In order to complete this report a listing of B.C. secondary manufacturing companies was developed gathering names from various industry associations, and from private and public listings. Companies in this listing were requested to complete a questionnaire.

Not all B.C. companies involved in secondary manufacturing of wood products are included in this directory .. Some elected not to respond to our requests to participate and provide company information. Others, despite concerted efforts to keep the company listing comprehensive, may have been missed.

If your company is not listed in the directory and you would like to be listed in the next update, a copy of the Data Request form is included at the end of the directory. Complete this and forward to the noted address.

## **HOW TO USE THIS DIRECTORY**

### **Section A Alphabetical Company Listing**

This Section consists of an alphabetical listing of the companies included in the directory. Each company is identified by name, the company address is provided, and the company is classified by business type and cross-referenced with the company profile page. The business type classification is based on the company's major product.

### **Section B Product Listing**

This section, in a yellow-pages format, lists the companies under a variety of products.

### **Section C Company Profiles**

The section is arranged by business type, contains specific company profiles. In addition to the address and contact name, each profile provides information on the number of employees, major plant equipment, products manufactured, custom services, species used, sales by region, and future market interests
