MARITIMES FOREST RESEARCH CENTRE  
FREDERICTON, NEW BRUNSWICK

INFORMATION REPORT M-X-26

CANADIAN FORESTRY SERVICE  
Department of The Environment

November, 1971

A collection of identified fungous isolates maintained in the Maritimes Forest Research Centre at Fredericton, N.B., provides a source of known fungi for various mycological and pathological investigations and serves as an aid in identification work.

Fungi in the collection are grown in 18 x 150 mm tubes containing 10 ml. of 1.5% malt extract or potato dextrose agar and plugged with Dispo plugs (Canlab). When growth has been established on the agar slants at room temperature, the cultures are stored at 5°C in refrigerators. This temperature retards further growth and slows drying of the agar. Isolates are transferred to fresh medium annually but subcultures of any isolate are available on request.

The scientific names of fungi in the collection are listed alphabetically. Complete synonymy has not been attempted. Cross-referencing is based on the Disease Cause Code issued by the Forest Insect and Disease Survey of the Canadian Forestry Service in 1968 and revised in September 1969. Taxa not included there are marked with an asterisk (\*).

Information on specific isolates is provided as follows:

1. Reference culture number.
2. Type of isolation - coded as follows:
  - F - Sporophore tissue culture,
  - T - Host tissue culture,
  - P - Polysporous culture,
  - M - Monosporous culture,
  - X - Other (Specified under remarks).
3. Year of isolation.
4. Location of collection - Province in Canada, State in United States, or country of origin (see Appendix, page 45, for abbreviations).
5. Source of culture (see Appendix, page 46, for coding).

6. Host.
7. Name of person responsible for identification or confirmation.
8. Isolate number at originating institution and remarks - in the second line, under host.

This catalogue, completely revised and updated, supersedes an earlier one issued in 1966.<sup>1</sup> In future, supplements to this catalogue will be produced annually.

The co-operation of persons providing identification and of establishments supplying cultures is gratefully acknowledged.

---

## APPENDIX -- ABBREVIATIONS USED IN THE CATALOGUE

## 1. Location of Collection

A. *Provinces of Canada*

Alberta	Alta.
British Columbia	B.C.
Manitoba	Man.
New Brunswick	N.B.
Nova Scotia	N.S.
Ontario	Ont.
Quebec	Que.
Saskatchewan	Sask.

B. *States of the United States*

Alaska	AK
California	Cal.
Colorado	Colo.
Florida	Fla.
Idaho	ID
Louisiana	La.
Maine	Me
Maryland	Md.
Massachusetts	Mass.
Michigan	Mich.
Nevada	Nev.
New Hampshire	N.H.
New Jersey	N.J.
New York	N.Y.
North Carolina	N.C.
Oregon	Oreg
Pennsylvania	Penn
Virginia	Va.
West Virginia	WV
Wisconsin	Wisc

C. *Other*

Norway	Norw
United Kingdom	U.K.
Uttar Pradesh, India	U.P.

## 2. Source of Cultures

- AEC A.E. Cameron, California. Affiliation unknown.
- ALS A.L. Shigo, Northeastern Forest Experiment Station, Forest Service, U.S.D.A., Durham, N.H.
- BFDL Center for Forest Mycology Research, Forest Products Laboratory, Madison, Wisc. (Formerly Beltsville Forest Disease Laboratory, Division of Forest Protection Research, Forest Service, U.S.D.A., Laurel, Md.)
- C Northern Forest Research Centre, Canadian Forestry Service, Edmonton, Alta. (Formerly Forest Research Laboratory, Calgary, Alta.)
- CBS Centralbureau voor Schimmelcultures, Baarn, Netherlands.
- CFSF Maritimes Forest Research Centre, Canadian Forestry Service, Fredericton, N.B.
- CFSS Great Lakes Forest Research Centre, Canadian Forestry Service, Sault Ste. Marie, Ont.
- CFSV Pacific Forest Research Centre, Canadian Forestry Service, Victoria, B.C.
- CRFQ Laurentian Forest Research Centre, Canadian Forestry Service, Ste. Foy, Que.
- DAOM Mycological Herbarium, Plant Research Institute, Department of Agriculture, Ottawa, Ont.
- FPLO Eastern Forest Products Laboratory, Canadian Forestry Service, Ottawa, Ont.
- FPLV Western Forest Products Laboratory, Canadian Forestry Service, Vancouver, B.C.
