ABSTRACT

Selected Forestry Statistics, Ontario: 1987 contains ready references and valuable information for members of the forestry community and other interested individuals seeking quantitative data on Ontario's forest sector.

Included are statistics on forest management, the forest industry, commodity production and trade, principal statistics by industry group, price indices, financial data, and information on the Canada-Ontario Forest Resource Development Agreement and forest sector collective bargaining settlements.

RÉSUMÉ

Selected Forestry Statistics, Ontario: 1987 est un recueil d'informations facile à consulter qui sera utile aux forestiers et aux autres personnes intéressées à obtenir des données quantitatives sur le secteur forestier en Ontario.

Il s'agit d'un recueil de statistiques concernant l'aménagement des forêts, l'industrie, la production et le commerce des produits forestiers, les statistiques principales de divers groupes composant l'industrie, les indices des prix, les données financières, et les renseignements sur l'Entente Canada-Ontario sur la mise en valeur de la ressource forestière et les conventions collectives.

The FORSTATS (FOREstry STATistics) Program of the Canadian Forestry Service provides current statistical information on Canada's forest resources, including periodic descriptions and analyses of forest inventory and growth; losses from insects, diseases, and fire; nursery production and silvicultural practice; and social and economic conditions.

The following federal government establishments participate in the FORSTATS Program: Canadian Forestry Service Headquarters in Hull, Que., the Pacific Forestry Centre in Victoria, B.C., the Northern Forestry Centre in Edmonton, Alta., the Great Lakes Forestry Centre in Sault Ste. Marie, Ont., the Laurentian Forestry Centre in Ste-Foy, Que., CFS Maritimes in Fredericton, N.B., the Newfoundland Forestry Centre in St. John's, Nfld., the Petawawa National Forestry Institute in Chalk River, Ont., and the Forest Pest Management Institute in Sault Ste. Marie, Ont. Provincial forestry agencies, other provincial and federal agencies, and the forest industry cooperate in providing data for the program.

FOREWORD

Selected Forestry Statistics, Ontario: 1987 contains a series of tables on Ontario's forest industry, its forest resources and related management activities, depletion, commodity production and trade, employment statistics, principal statistics by industry group, and other related data that will be of interest to members of Ontario's forest community.

Over 60 tables are included in the report. Data have been extracted from a variety of provincial and federal government reports and from other sources. A number of figures have been included to assist the reader in visualizing the data presented in tabular form.

The section that provides information on Ontario's forest resource contains a glossary of forest inventory terms to assist the reader in understanding and interpreting the information provided. A number of tables present information that is based on the eight Ontario Ministry of Natural Resources' administrative regions. Readers who are not familiar with these regions should refer to the map provided in the Appendix.

SECTION II

FOREST INVENTORY

Glossary of inventory terms^a.

Forest Inventory

A survey of an area to determine such data as area, condition, timber, volume and species, for specific purposes such as planning, purchasing, evaluating, managing, or harvesting.

Gross Merchantable Volume

Volume of the main stem of trees or stands, excluding stump and top but including defective and decayed wood.

Gross Total Volume

Volume of the main stem of trees or stands, including stump and top as well as defective and decayed wood.

Production Forest

All productive forest land managed primarily for growing timber for industry, unless otherwise reassigned.

Production Forest Reserve

Production forest stands which in the opinion of photo interpreters may constitute a logging or silvicultural problem.

Productive Forest Land

All forest areas capable of growing commercial timber.

Protection Forest

All productive forest land managed primarily to exert beneficial influence on soil, water, and the overall landscape.

Volume

The amount of wood in a tree, stand, or other specified area, according to some unit of measurement or some standard of use.

Working Group

An aggregate of stands, including potential forest areas assigned to this category, having the same predominant species, and managed under the same rotation and broad silvicultural system.

Table 9.2. Canada-Ontario Forest Resource Development Agreement.

Duration: 1 April, 1984 to 31 March, 1989

Total cost: \$150 million (cost-shared 50/50, Canada/Ontario)

- Objectives:
- a) to encourage and support forest management activity in order to increase the sustainable supply of wood fibre from the forest resource and ensure the long-term viability and competitiveness of the forest industry in Ontario;
 - b) to improve and increase the utilization of the forest resource to enhance future forest industry development opportunities;
 - c) to contribute to the economic development of the Ontario forest sector, including the improvement of employment opportunities in the sector.
